

TRAK\$

Currency for healthy communities.

TRAK\$ work like money and can be used with a mobile app or card.

56% of TRAK\$ profits fund community development.

TRAK\$ are free to use.

## Problem:

US agencies struggle with digital currencies as consumers and businesses seek a safe, useable option.

## Solution:

TRAK\$, a regulated, reserve backed, stable digital currency built to protect privacy, law, people and rights.

*“our current payment mechanisms, domestically and internationally, have inefficiencies, those inefficiencies are the things that are driving the rise of bitcoin”*

- SEC Chairman Clayton (November 23, 2020)

Despite its recent rise, bitcoin price volatility, slow transactions, lack of regulation, power needs, and illicit activity problems limit mainstream use.

*“private digital currency based payment systems could magnify concerns surrounding illicit activity and consumer risk”*

- Federal Reserve Governor Brainard (February 5, 2020)

TRAK\$ transactions are federally audited. The TRAK\$ system collects and remits taxes and flags and reports illicit activity. Encryption and distributed ledger technology eliminate common consumer vulnerabilities.

*“if we really think the crypto world is going to be part of the future, it needs to come inside of public policy envelope.”*

-Gary Gensler, Biden's incoming SEC Chairman (October 15, 2018)

*“regulating institutions that deal in bitcoin...is certainly important.”*

-Janet Yellen, US Treasury Secretary (February 18, 2021)

Bitcoin are not regulated. TRAK\$ are issued and regulated by INTR, a sovereign tribal reserve with federal, state and tribal authority and US Treasury Certified Community Development Entity (CDE).

*“the opportunity to develop multiple regulatory solutions to a single problem, is a feature of the United States’ own system”*  
- SEC Commissioner Hester Peirce (July 30, 2019)

## Why is digital currency not widely used?

- lack of regulation
- unstable value
- slow transactions
- stigma from use in money laundering, tax evasion

## TRAK\$ are built to protect users and the law

- regulated and protected by law
- always worth \$1 and 100% reserve backed in US banks
- closed loop payment mechanism that is fast, efficient, and safe
- prevent money laundering and tax evasion

TRAK\$ are free to use and any business can accept them.

56% of profits fund community development.

TRAK\$, currency for healthy communities.
